Blood Bank of Alaska, Inc.

The Blood Bank of Alaska completed construction of its 11,000 square foot building in the summer of 1981. Although planned to accomodate growth and expansion, the building was primarily designed with the donors and the community in mind. Currently occupying the entire bottom floor, the Blood Bank can accommodate up to 175 donors a day. The ski lodge appearance of the facility, with open-beamed ceilings, stone fireplace, and wood paneling provides a warm, non-institutional atmosphere for the donors. The Blood Bank of Alaska was also designed to serve the community as a disaster facility, complete with its own power generation and water supply. In the event of a catastrophic emergency, it can continue to operate when little else can and provide a life-giving service to the people of Alaska.

Medical Director
Franc Fallico, MD

United Blood Services

Blood Systems, Inc. is a nonprofit [501(c)3] organization, licensed by the federal government. Founded in 1943, Blood Systems today encompasses a research foundation and three operating divisions, the largest of which is United Blood Services.

United Blood Services maintains community blood centers and satellite donor centers to serve some 900 hospitals in a geographic area covering one-third of the United States. These regional centers provide blood, blood components and a number of related services to more than 15 million people.

Blood Bank of the Redwoods

Blood Bank of the Redwoods' new facility features a red brick exterior and large amounts of glass which give a feeling of openness and light. The 13,540-square-foot building provides working space for 9 beds, four private history stations and expanded laboratory facilities. The building was designed to be open, inviting and comforting, not clinically intimidating to its blood donors. Yet it houses the most up-to-date equipment and allows for change and expansion in the years ahead.

Blood Bank of San Bernardino-Riverside Counties

The Blood Bank of San Bernardino-Riverside Counties drew its first donor on June 9, 1951. Developed by the two County Medical Societies on the strength of contributions from member physicians. The Bank has grown parallel to the expanding population of the two counties and the 30 hospitals it serves. The Bank serves its community not only as its sole blood supplier, but as an educational and reference center as well, administering an SBB program, educational seminars and reference and HLA laboratories.

Stanford Medical School Blood Center (Stanford University Blood Bank)

Stanford University Blood Bank and the Stanford Medical School Blood Research Facilities are located in the Stanford Medical School Blood Center. Stanford established its own blood program in 1978 in order to better meet the needs of its patients. This was particularly critical for the large numbers of premature infants, cancer patients and cardiac surgery patients who require specialized blood products. The Blood Center staff are nationally acknowledged leaders in developing and utilizing the most advanced techniques. A unique feature of the blood bank program is its integration into the Stanford Medical Center research programs. This benefits patients by providing direct and immediate application of important medical advances made by Stanford scientists and their colleagues. The Blood Center has had a directed donor program since 1983 and strongly encourages autologous donations for patients with a foreseeable need for transfusion.

Belle Bonfils Memorial Blood Center

The Belle Bonfils Memorial Blood Center was officially opened February 27, 1942. In December 1945, it was reorganized and incorporated. In September 1945, it was designated the official blood bank of the Colorado State Medical Society. A small grant from Helen C. Bonfils made the establishment of the Center in memory of her mother, Belle Bonfils. It is nonprofit, self-supporting and the only community blood center in Denver and Colorado. Its set of basic goals are supply, quality, accessibility and efficiency. It provides services to 57 hospitals in Denver and the state of Colorado.

Blood Bank of Delaware, Inc.

Blood Bank of Delaware was established as a donor scheduling/blood assurance program in 1955. In 1977, the organization became a full-service community blood bank serving 14 institutions in the state of Delaware and northeast Maryland. Today it provides all blood and components required in the region.

Jacksonville Blood Bank, Inc.

The Jacksonville Blood Bank began receiving donors on October 27, 1942. The JBB was started by the Duval County-Jacksonville Defense Council to support the military and civilian population during the war effort. Since the time of its founding, the JBB, a nonprofit organization, has provided all of the blood and related services to all of the hospitals in the Jacksonville area. The JBB provides blood for hospitals in seven counties. The JBB draws approximately 50,000 units of blood per year.

Lower West Coast Blood Bank, Inc.

Lower West Coast Blood Bank, Inc. was founded in 1949. While the original concept of a regional blood bank serving the lower west coast of Florida did not fully flower, we have continued to serve the needs of local health care institutions for blood products and related services. Today, we are experiencing a tremendous surge in our population growth. Blood usage is increasing at a rapid pace. As a consequence we forsee a continuing need for expansion and modernization of our facilities and services. We are pleased that our volunteer donors and our health care providers continue to consider Lower West Coast Blood Bank as the leader in area blood banking.

Marion County Blood Bank, Inc.

The Marion County Blood Bank, Inc., is an independent "non-profit", "full service" blood bank that was established May 1, 1957, which continues to provide extensive services to our four county service area. In addition to donor recruitment and collection at our main complex in Ocala, Florida, our Citrus County Inverness Substation, and our active mobile unit, an ever expanding donor apheresis program is sustained. Providing blood and blood products represents only one aspect of the Marion County Blood Bank's committment to service. Our laboratory facility, located at our main complex, performs donor processing and component preparation, outpatient and reference testing services as well as providing comprehensive 24 hour regional compatibility testing to the hospitals and dialysis centers served. Specialized procedures are also available for hepatitis profile screening, parentage testing and histocompatibility testing. With consistent growth and increasing needs, the Marion County Blood Bank will diversify to meet those needs and continue to provide quality service to our service area.

Putnam County Blood Bank

Putnam County Blood Bank was established on Dec. 15, 1958 to provide blood products for Putnam County residents. At present we provide blood products and related services to Putnam Community Hospital. On Jan. 5, 1987 we opened a permanent drawing station at Community Health Services Building in Crescent City to better serve our south Putnam County donors. Our long range plan is to provide blood products to this facility when it opens as a hospital.

American Red Cross Blood Services, Heart of Illinois Region

The heart of Illinois Region offers a full range of blood banking services to 47 hospitals. In addition to providing blood/blood products and laboratory services to service hospitals, the region sponsors a comprehensive care hemophilia program to hemophiliacs throughout central and northern Illinois. The region also supplies physicians throughout the area with bone and other tissues used in transplantation. The region has a clinical laboratory license and performs various tests for hospitals and physicians.

Aurora Area Blood Bank

The Aurora Area Blood Bank and Donor Society was incorporated in 1943 to serve the hospitals in Aurora. The Aurora Area Blood Bank has since grown to be a full service blood center providing all the blood needs for the patients in 24 hospitals west and south of Chicago. It has four subcenters in addition to the main center in Aurora. In 1986 the Aurora Area Blood Bank staff of 124 employees collected and processed over 67,500 units of blood.

Central Illinois Community Blood Bank

Springfield serves as the capital City of Illinois. It is a city of 95,000 people located in the geographic center of the state. The two major industries of the community are government and health care. The Blood Bank was founded in 1971 as a non-profit corporation to meet the entire blood service needs of participating hospitals. The hospitals served range in size from a 30 bed facility using 100 units of packed cells each year to an 800 bed urban medical center needing over 14,000 units of blood and 10,000 units of components annually.

Siouxland Blood Bank

The Woodbury County Medical Society and the Sioux City Hospitals sponsored the Siouxland Blood Bank in December, 1967, to serve the blood needs of the city. The Medical Director is a pathologist from one of the hospitals who assumes the post for two years. Over the years, we have supplied the 14 area hospitals and in 1984 moved to our larger present facility. In 1981, a pheresis program was implemented.

Topeka Blood Bank, Inc.

Nestled near the heart of the city and in the state capital's medical quarter, the Topeka Blood Bank provides 10,000 square feet of comfortable work space. The seven-bed drawing room contains a canteen and an alcove for apheresis. The one-story, wood and natural brick structure contains four medical history booths as well as two waiting rooms to handle days with especially high traffic. On premises labs are: infectious disease lab, component lab, reference lab and freezing lab. A continuing education conference room is available for meetings with blood bank associated groups. Offices and work stations fill in much of the remaining space. A small portion of the facility is occupied by the Shawnee County Medical Society.

Camp Memorial Blood Center

The Camp Memorial Blood Center (CMBC) (formerly The Blood Bank Center) was dedicated on 12 July 1984 in the memory of COL Frank R. Camp, Jr., MSC, US Army retired. COL Camp was the first Director/Commander of this Center. CMBC is charged with the responsibility for the collection, processing, manufacture and distribution of blood products to military medical treatment facilities in the United States (including Hawaii and Alaska) and Panama. CMBC, founded in 1965, collects blood from military personnel, their family members and Department of the Army civilian employees at Fort Knox and Fort Campbell, Kentucky, and Fort Benjamin Harrison, Indiana.

The Blood Center for Southeast Louisiana

The Blood Center for Southeast Louisiana is a free standing 501(c)3 non-profit institution serving 44 hospitals in 13 parishes. During the past six years the blood center has made geat strides in developing a regional blood program in the Southeast Louisiana area. Whole blood collections have increased steadily each year from the 38,000 units drawn in 1980 to the 91,000 units drawn during 1986. In addition to blood collections, the Blood Center operates an AABB approved reference lab, a pheresis program and a long-term frozen blood program.

Louisiana Blood Center

The Louisiana Blood Center
The Louisiana Blood Center was established in Shreveport, June 17, 1942, as the Shreveport Memorial Blood Bank with a grant from the Shreveport Chamber of Commerce and the endorsement of the Shreveport-Bossier Medical Society. In October of 1979, at the request of the local hospitals, additional centers were opened in Alexandria and Monroe. The Lake Charles Center was opened October, 1981. In 1986, the Pelican Tissue Center was formed to collect, process and distribute bones and soft tissue. At present the Louisiana Blood Center is providing service to 66 hospitals in 35 parishes.

American Red Cross Blood Services, Southeastern Michigan Region

The American Red Cross, Detroit Chapter, established the Detroit Community Blood Center in 1946 at the request of the community. The Chapter had opened the center during the war years for the collection of plasma needed by the Armed Forces and closed it in 1945 at the end of World War II. By 1953, the region had expanded to encompass five counties and was known as the Southeastern Michigan Red Cross Blood Services. Blood is collected at nine regional donor centers and 12 mobile units. The region is located in a major medical center for the state and provides blood services to 70 hospitals in the five counties it serves.

Community Blood Bank of the Lancaster County Medical Society

Community Blood Bank of the Lancaster County Medical Society
Community Blood Bank of the Lancaster County Medical Society was incorporated as a nonprofit organization in 1968. Total blood service for the community of Lincoln, NE, provided by volunteer donors was the goal and continues to be the primary objective of the blood center. Centralized recruitment, collection, processing and distribution along with other blood center functions has increased the size of the operation.

American Red Cross Blood Services, Syracuse Region

The Blood Center officially opened on June 9, 1949 with twelve chapters participating in the regional program. The Center presently serves 41 hospitals in 15 counties of central and upstate New York. The facility includes a main laboratory (12,000 sq. ft.) and an 800 sq. ft. research and development laboratory.

Governing Body
The Regional Blood Services Committee has executive power with respect to all regional Blood Services matters, subject to the approval of the Board of Directors of the Syracuse & Onondaga County Chapter.

Association Membership
Blood Bank Association of NYS

Computer Services
Integrated blood information system run on HP 3000. System applications include laboratory and shipping product management, donor recruitment, donor surveillance and accounting.

Research Projects
CMV Infection in Renal Transplant Patients
Detection of Antibody to CMV Early Antigens
CMV Serostatus of Blood Donors
Follow-up Study of Donors Reactive for HIV Antibody
Follow-up Study of Donors with Atypical HIV Western Blot Patterns
Evaluation of Assays for Anti-HIV Detection in Blood Donors

American Red Cross Blood Services, Carolinas Region

American Red Cross

Blood Services Carolinas Region collects an average of 1,100 units of blood a day to provide blood products to more than 90 hospitals in its 56-county area. Collection efforts are coordinated by blood services programs at 54 Red Cross chapters throughout the Carolinas region. Volunteer donors give blood at scheduled bloodmobiles (about 12 mobiles are in operation a day) and at fixed-site locations at each processing facility and in Raleigh. Although each blood donation is processed and stored for delivery at one of the four (4) processing facilities located in Charlotte, Durham, Winston-Salem and Wilmington, the testing and product management functions are centralized at the region's headquarters in Charlotte. The fourth largest blood region in the American Red Cross system, Carolinas Region is mainly supported by cost-recovery fees charged to hospitals.

American Red Cross Blood Services, Northern Ohio Region

The Northern Ohio Red Cross Blood Services was established in 1951 to serve an area of 15 counties approximately 3.75 million people. Initially, the Red Cross Center provided approximately 50% of the blood needs in Cleveland hospitals and 100% outside of Cleveland with commercial banks providing the balance. Today, the Northern Ohio Red Cross Blood Services supplies 93% of the blood for Cleveland hospitals plus 100% of the blood and components for 40 regional hospitals. The region is supplied completely with blood from volunteer donors. The Northern Ohio Red Cross Blood Services offers a complete range of blood products and services, such as reference lab, HLA lab, an SBB program and numerous other educational offerings. The Blood Center is dedicated to serving all the transfusion needs of Northern Ohioans in accordance with the highest blood banking standards.

Hoxworth Blood Center of the University of Cincinnati

Hoxworth Blood Center was founded December 10, 1938, by Dr. Paul I. Hoxworth. It is one of the oldest community blood centers in the country, now serving 30 hospitals in a thirteen-county region of Ohio, Kentucky, and Indiana. During the first year of operation, the community blood needs totaled less than 2,500 units. This year, more than 87,000 units of blood will be needed for area patients.

Lane Memorial Blood Bank

lane memorial blood bank

Lane Memorial Blood Bank was established under the sponsorship of the Lane County Medical Society and incorporated February 24, 1961. Operations commenced July 1, 1961, with the purpose of providing blood and blood components for Lane County residents in the five area hospitals. The blood bank has grown steadily and is now housed in a modern facility which was dedicated in 1978 and expanded in 1983 to meet future needs.

Central Pennsylvania Blood Bank

The Central Pennsylvania Blood Bank is somewhat unique in that approximately two-thirds of all bloods are drawn in our member hospitals. The remaining third is drawn on our Bloodmobile units. However, we are responsible for 100% of the blood need, 24-hours a day, 365 days per year. All donations at member hospitals become part of our master computerized donor call file, which is produced by blood type in order of date of donation. Each member hospital is inventoried twice daily and an anticipated outdate for the next eight days is obtained. Based upon this information, donors are sent to specific hospitals for specific needs, or blood is moved from one institution to another by our courier. We are also responsible for all public relations and recruitment of all blood donors for the area.

Blood Assurance, Inc.

Blood Assurance became fully operational in January, 1972, through the efforts of three organizations—the Chattanooga Jaycees, Chattanooga-Hamilton County Medical Society, and the Chattanooga Area Hospital Council. Having started as a supplemental supplier, with an administrative office only, it has been the sole supplier of blood products from volunteer donors since 1978, shortly after moving to the present center. Satellite donor stations and other services have been expanded over the years.

West Tennessee Regional Blood Center, Inc.

LIFELINE
Volunteer Blood Program

The predecessor, Jackson Blood Bank, was established in 1947 as a partnership venture. In 1972, it was sold to West Tennessee Regional Blood Center, Inc., a nonprofit corporation. FDA license has been continuous since 1949 at which time Jackson Blood Bank became an Institutional Member of AABB. WTRBC draws blood in three counties on the community-responsibility philosophy. The replacement-deposit fee and credit system operate in all counties. At present, WTRBC is providing complete services to twelve hospitals in eight counties and partial service to an additional eleven hospitals in ten counties. LIFELINE, Volunteer Blood Program is the Blood Assurance Plan operated by WTRBC. In April, 1983 WTRBC moved into a new 13,450 square foot building.

The Lifeline

Central Texas Regional Blood Center

The Central Texas Regional Blood Center is a non-profit regional blood center that was founded by the Travis County Medical Society in 1951. The blood center telephone recruiters provide 57% of the donors in the blood center. In 1986 there were 8.2% more donors drawn than 1985. The Tissue Bank is active in the newly formed Central Texas Transplant Program. The blood donors in Central Texas are extremely big-hearted and respond immediately to our needs—especially in time of shortages.

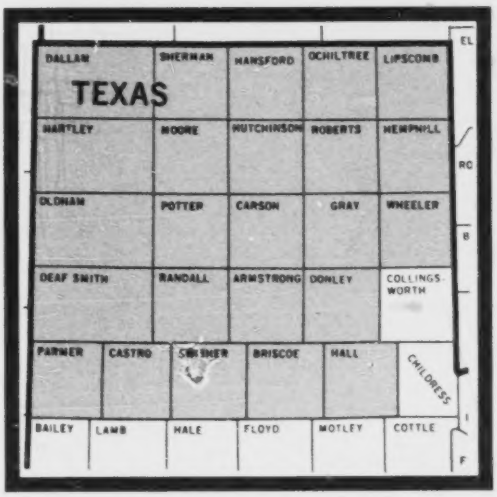
Coffee Memorial Blood Center, Inc.



Coffee Memorial Blood Center was founded in 1949. From simple beginnings, it has grown to a staff of 30 and services 20 hospitals while drawing 19,000 pints annually in 24 counties. Coffee Memorial is the total supplier for most of the Texas panhandle. It offers a full range of component products and a pheresis program to area physicians.

American Red Cross Blood Services, Tidewater Region

Tidewater Regional Blood Services of the American Red Cross, located in Norfolk, Virginia, first began service in 1949 and is a member of the American Red Cross Blood Services network. The Tidewater Region is the sole provider, with the exception of the Navy, of blood and blood products for 2.5 million residents in southeast Virginia and northeast North Carolina. The region covers 63 counties and over 66,000 square miles and encompasses 56 Red Cross chapters.
